## TRUSTEES' REPORT.

---

*To His Excellency the Governor and the Honorable Council.*

We have the honor to submit our twelfth annual report.

Early in the year, our superintendent, Dr. Charles T. La Moure, resigned to take a position in another State. His departure was a loss to the insane of this State. His work at the State Hospital in Rochester, N. Y., before coming to the colony was marked by an intelligent and promising experiment in re-educating the youthful demented cases. This work it was hoped he would be able to continue and enlarge at the colony, but the pressing duties of superintendence interfered so seriously that he sought other fields where he could have freer scope. In losing him, the State has missed obtaining the credit of a most promising experiment.

As his successor, this Board re-elected Dr. Charles E. Thompson, the former superintendent, who left us to become the secretary of the State Board of Insanity. The State Board, however, was unable to dispense wholly with his services during the time that the legislative committees were dealing with the appropriations for the various institutions, so that for several months he divided his time between those two lines of work.

We again report progress. We do not suggest provision for more inmates, feeling that the development of the colony idea can best be had without a too rapid increase in population. We have done much to develop the industrial efficiency of the patients, to normalize their lives and make them contented, but we have done very little to brighten their lives with relaxing amusement. We renew the request made last year for a chapel and meeting hall. At present we have no hall of any kind, and religious services and entertainments must be held in a ward

of a building not large enough to hold even half of our patients. In the outside world, no community of seven hundred people would remain long without a church building and some place for social meetings. Our patients are not so distraught in their minds as not to miss the opportunities for the entertainments of the outside world, and the hard-working staff of employees deserves some place in which they may meet each other. It is impossible to get a force of loyal and contented nurses and attendants, so necessary to the humane treatment of the insane, if each one is banished to a lonely chamber at the close of the day's work. It is an old saw that "All work and no play makes Jack a dull boy," and in the interests of both patients and their attendants we renew our plea for a building suitable for religious services and social meetings and commodious enough to contain our whole population.

EDMUND A. WHITMAN.

GEORGE N. HARWOOD.

ALICE M. SPRING.

AMIE H. COES.

WILBUR F. WHITNEY.

JOHN G. BLAKE.

WILLIAM H. BAKER.

## SUPERINTENDENT'S REPORT.

---

*To the Trustees of the Gardner State Colony.*

I respectfully submit herewith the twelfth annual report of the operations of the Gardner State Colony.

The statistical tables showing in detail the financial operations for the year ending November 30, and those relating to patients for the hospital year ending September 30, will be found at the end of this report.

There have been no epidemics of any disease of consequence. One patient, a man who eloped, developed typhoid fever directly following his return. Recovery was uneventful and no other cases made their appearance.

One serious accident occurred. A young man who had for some months assisted the engineer, in reaching carelessly over a pump gear, was drawn into the cogs and received a severe laceration of the upper arm, chest and axilla, exposing the axillary vessels and nerves. An extensive operation was necessary which was performed by our staff. The patient has now practically entirely recovered, and will regain the use of the arm but with impairment of motion.

The development of industries for which the colony was started, and which has occupied fixed attention since, has continued. Actual accomplishments ebb and flow with the active interest shown by those who daily instruct the patients. The instructor's interest, and especially his enthusiasm, depends largely upon the interest taken by the supervisor of industries and the physicians, but more especially, it seems to me, by the superintendent and trustees. Taken as a whole, the results so far have been fairly satisfactory. Since 1907 practically all ordinary clothing, both men's and women's, has been made by the patients. An increasing demand has this year made a

more complete equipment necessary, and we are now making more and better clothing.

Weaving, for a time largely discontinued, has again been taken up actively. Those industries which have been in operation for some years, such as shoe making, brush making, broom and mattress making, furniture making, plain and fancy sewing, basketry, rug making, and many others, have been continued. These occupations provide pleasant and interesting occupations to the individual patients selected by the physicians for each kind of work. The various forms of occupation have, from the first, been planned so as to claim the interest and attention of a class of patients transferred to us from the State hospitals who, because of mental impairment and institutional inactivity, have drifted into a state of "dementia," a term frequently carelessly used and made to include, with the actual death of brain cells, the inactivity due to pauperization. Many of our patients, especially the men, show a mixed state in which the pauperization is more difficult to overcome than the mental disease itself.

To stimulate active interest in the work to be performed is of foremost importance. In most adult patients of this general type it is somewhat absurd to use "kindergarten" methods. Such patients need quite the same treatment as ordinary individuals, — a fair amount of work of an instructive nature, made interesting to them. It should, if possible, have some value to the patient or institution. Overwork must be avoided and common sense used.

There is some tendency among enthusiasts to-day to treat all insane as acutely ill patients, even though they are of the chronic dementing group. Able-bodied men and women not acutely ill do not seem to me to be so much interested in or benefited by "invalid occupations" as by worth-while occupations. The occupation prescribed should, if possible, be something more than a plaything.

So also the terms re-education, therapeutic work, industrial training, etc., are frequently used to mean interesting occupations. I take it for granted that recreation and entertainment occupy a place in every institution of whatever type.

## TRAINING.

In order to avoid what has been termed “vigilance” nursing among the chronic insane, we are endeavoring to so train our attendants that they will be instructors while attending to the usual attendants’ work, by requiring all attendants to attend daily talks and demonstrations of actual industries carried on in the industrial building. It is believed that in no other way will they grasp the idea of occupation as a part of treatment. This training, if successfully given, should result in better and longer service on the part of the attendants, and should also assist them in obtaining better positions on leaving.

In addition, a course of lectures on medical subjects and general nursing has been planned. That our instructors may sustain their interest and enthusiasm in the work, we have arranged a monthly teachers’ visiting day, at which time all instructors, who desire, may visit other institutions or places in which industries are carried on.

## FARM AND GROUNDS.

Many have been engaged throughout the year, as in past years, in work on the farm and about the grounds. The return this year from the farm is the best of any year since the colony was started. There apparently will be enough vegetables to last throughout the coming year.

Co-operation of the State Forester’s department has resulted in their supplying us with 50,000 young pine seedlings. This department has also given us valuable advice in the thinning out of our woodlands. The following table shows in general the work accomplished on the farm during the year:—

Vegetables (acres), . . . . .	50½
Green feed (acres), . . . . .	59
Hay (acres), . . . . .	61
<hr/>	
Total acres under cultivation, . . . . .	170½
Total value of farm products, . . . . .	\$40,092 70
Land brought under cultivation (acres), . . . . .	15
Brush land subdued (acres), . . . . .	10

Woodland cleared of undergrowth (acres), . . . . .	65
Pasture land cleared (acres), . . . . .	3½
Land reforested with pine seedlings (acres), . . . . .	9½
Set to small fruits (acres), . . . . .	1½
Number of shade trees set out, . . . . .	40
Number of shrubs and rose bushes set out, . . . . .	36
Lumber cut and sawed (hemlock, spruce, pine) (feet), . . .	66,000
Excavation:—	
Earth (cubic yards), . . . . .	8,207
Rock (cubic yards), . . . . .	715
Grading about the buildings (square yards), . . . . .	5,242
Stones removed from the field (tons), . . . . .	19,455
Stone used as follows:—	
In building (tons), . . . . .	696
In roads (tons), . . . . .	15,541
In sidewalks (tons), . . . . .	1,138
In fillings (tons), . . . . .	250
Crushed in the stone crusher (tons), . . . . .	1,295
Excavation of earth includes the following:—	
Drainage ditches dug:—	
725 feet long, 5 feet wide, 4½ feet deep.	
850 feet long, 3 feet wide, 3 feet deep.	
Road built complete (feet), . . . . .	4,400
Road capped with crushed rock (feet), . . . . .	1,800
Stone culverts built (410 square feet of top, 18 feet deep, each,	2
Ditches for water pipe, 595 feet long, 3 feet wide, 5 feet deep.	

Women have, in several departments, been occupied out-of-doors, chiefly under the general supervision of the assistant physician. A group of disturbed and destructive women patients are taken out each morning in charge of a nurse, and the beneficial effect is seen in the general behavior of the patients, and also in a marked saving of clothing, glass and crockery. We expect to continue this outdoor class throughout the winter.

#### OFFICIAL STAFF.

Dr. Harlan L. Paine, for five years assistant physician at the Danvers State Hospital, was appointed March 15 as assistant superintendent to take the place left vacant by the resignation of Dr. Thomas Littlewood, who has entered private practice.

Dr. Chester A. VanCor was appointed August 17 as second assistant physician, to fill the position previously occupied by

Dr. Thomas W. Maloney, who accepted a position on the staff of the Connecticut School for Imbeciles.

Dr. P. James Grant, dentist, of Gardner, began his services June 16, and spends one day each week at the colony.

Miss Elizabeth S. Edwards was appointed director of industries for women on April 27.

#### BETTERMENT.

One cottage for 16 patients was completed and occupied in December, 1913. A cottage for 30 women patients was completed in June, but occupied through the summer months by men patients who have done the filling and grading about this building and two nearby cottages.

A slaughterhouse, for which provision was made in 1914, is closed in and nearing completion. Alterations of barn, also provided for in 1914, have been completed. The iron smoke-stack, erected at the power house in 1904, was replaced by a radial brick chimney, the stack having rusted out and blown down. Continuous bath tubs have been installed for treatment purposes in the women's receiving ward, and in the men's receiving ward. Granolithic walks have been built between the receiving wards and the dining room.

Deficiency in our maintenance appropriation has resulted in making fewer general repairs than have been needed, and these have been provided for in our request for the maintenance appropriation for 1915.

#### GENERAL.

Staff meetings and industrial conferences are held from 8 to 9 A.M. Every patient in the colony is now being considered with a view to send out as many patients as possible to their relatives or to board out. Patients who have become quiet, harmless, and perhaps fairly efficient, are frequently compelled to remain within an institution as their relatives are not sufficiently interested to provide for them, or perhaps there are no near relatives.

Family care is being developed to care for these patients outside of the institution. An assistant physician will, the first year at least, act as community worker.

A female nurse has recently been placed in charge of the male infirmary.

Arrangements have been made for a monthly clinic in Fitchburg, to which physicians, social workers, former patients and persons seeking advice for themselves or relatives may come for information. There are no special hours for clinics at the colony, as we are glad to give assistance and advice at any time to all who may apply.

Since May, the colony has been open at all times to friends of the patients, or to visitors of the institution, no restrictions of any kind being imposed as to time of visit.

The usual dances and entertainments for patients have been provided, while employees arrange, by their own committees, for frequent dances or socials, with music and refreshments provided by the colony.

The colony has been visited by many hospital workers during the year, some of whom have come from distant points to view the work we are attempting here.

#### RELIGIOUS SERVICES.

Protestant services have been held every second Sunday afternoon during nine months of the year.

Catholic services have been held each Sunday morning throughout the year.

Hebrew services were held once each month at the beginning of the year, and twice monthly since July 1.

#### ACKNOWLEDGMENTS.

The McLean Hospital has kindly provided us with sixty library books, duplicates in their library, but which form a valuable addition to our library.

Mrs. Amie H. Coes, trustee, has continued an annual gift of monthly magazines.

We have also received each year since the colony was started a copy of the "Church Record" of Athol, and a copy of "Dumb Animals." A number of copies of the "Christian Science Monitor" has also been received.

Many friends of the colony have provided used magazines, papers, etc., for which we are grateful, and for which there is a large demand.

#### RECOMMENDATIONS.

The Hiram Ray estate, which is adjacent to and partly surrounded by colony land, can be purchased to advantage. In addition to the land, the house, with few changes, will provide comfortably for 20 patients, and the large barn adjacent would make unnecessary the erection of a barn badly needed at the Hillcrest cottage nearby.

At the Gardner cottages, occupied by 120 people, the cess-pools overflow into the brook which flows through our ice pond and continues on through the source of our water supply. The State Department of Health has recommended that filter beds should be constructed at an early date.

Our water supply should be further extended by the addition of a well, recommended by our consulting engineer, which well would be of sufficient size to act as a reservoir. The continued dry summer and fall seasons, together with the large number of people now being served, have made the obtaining of a sufficient supply of water difficult during a part of the year. During September, October and November of this year it has been necessary to run the pumps practically twenty-four hours a day to meet the needs of the institution. A reservoir well should be constructed this year.

Further provisions for married families should be made, such provision resulting in greater stability of service. The colony is three miles from any town, with no electric and poor train service.

The assembly hall and chapel requested last year, but not granted, is badly needed. At present, less than half the patients can attend entertainments in the room available. In addition the danger in crowding a room of this kind in which the seats are removable is considerable.

Inasmuch as occasional requests come from relatives in the vicinity of the colony to have patients committed directly to us, it would seem desirable to suggest some changes in the existing

law whereby suitable cases could be admitted, if approved by the superintendent.

The confidence you have expressed in asking me to return to the work of the colony, together with the continuance of the spirit of co-operation which has always existed between us, makes me feel very hopeful for and especially desirous of success in the work of the colony.

Respectfully submitted,

CHAS. E. THOMPSON,

*Superintendent.*
